Contents

Preface

Introductory Models 1

Section 1.1 Mathematical Models 1
Section 1.2 Systems of Linear Equations 11
Section 1.3 Markov Chains and Dynamic Models 21
Section 1.4 Linear Programming and Models Without Exact Solutions 37
Section 1.5 Arrays of Data and Linear Filtering 48

Matrices 61

Section 2.1 Examples of Matrices 61
Section 2.2 Matrix Multiplication 71
Section 2.3 0–1 Matrices 98
Section 2.4 Matrix Algebra 112
Section 2.5 Scalar Measures of a Matrix: Norms and Eigenvalues 127
Section 2.6 Efficient Matrix Computation 141
